Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This office action is in response to the amendment and drawings filed on 2/18/2004.

Claims 1-2 are still pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Galvin US patent Number 6,298,130.

As per claim 1, Galvin teaches a computerized method for managing router metadata, the method comprising:

Creating a metadata file (col. 9 lines 35 et seq), said metadata file defining objects in a router; reading the metadata file; converting (updating col. 9 lines 40 et seq) the metadata file into an object model having at least one object; and loading the objects onto the router (see col. 4 lines 15-67; col. 9 lines 14 et seq).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Galvin in view of Schoening et al US patent Number 6,226,788.

As per claim 2, Galvin does not explicitly teach loading the objects into an SNMP MIB. Schoening discloses an extensible network management system which includes SNMP and MIB (see Schoening col. 1 lines 37 et seq). It would have been obvious to one of ordinary skill in the art at the time of the invention to have combined Schoening SNMP and MIB to Galvin metadata-based network routing because it would have improved and facilitated communication over the router and network connections (see Schoening col. 1 lines 38-42).
